## DETAILED ACTION

### Application status

1. Receipt of the Preliminary Amendment filed December 12, 2002 is acknowledged.
2. Claims 278-296 are pending, replacing canceled claims 1-277.

### Priority claim

3. Information in applicant's priority claim set forth in the first sentence of the specification is not in agreement with applicant's information sheet as required. Correction is needed.

### Drawings

4. Figures 2A-2G are objected to because they are not in compliance with 37 CFR 1.821: SEQ ID NOS: for the nucleotide sequences are missing. Correction is required.

### Rejection under 35 U.S.C. 112, second paragraph: Indefiniteness

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 278-292, 295 and 296 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claims 278-289 are confusing due to incorrect syntax in the last line of (d), "to the polypeptide encoded by the DNA substrate molecule that is derivatized with the moiety" because the grammatical object (or antecedent) of "that is derivatized" is unclear. It is suggested to replace "that" with --which polypeptide--. This amendment will render claims 278 and 295 confusing due to their duplicity such that one of the claims must be canceled.

(b) Claim 290 is confusing because "the DNA substrate molecule that is derivatized with the moiety" in (d) lacks antecedent basis in the preceding steps. It is suggested to delete the offending phrase.

### Double patenting obviousness rejection

Art Unit: 1634

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 278-296 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,455,253. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to essentially the same methods wherein one of ordinary skill in the art would have known that "half life" is a measure of "stability". This is also supported by the patent section, "J. Half Life in Serum" which discusses stability to proteases in serum and to conditions such as pH and temperature.

#### Conclusion

7. **No claim is allowed.** However, the claims are free of the prior art.
